

As our communities grow, so do our **healthcare needs**

Our commitment to providing exceptional health care extends beyond today. It's about preparing for tomorrow and ensuring that our communities receive the best care possible for generations to come. This is where our Master Plan plays a pivotal role.

Hospital Capital Planning Process

Our Master Plan focuses on the development of healthcare services and potentially a new hospital to meet the communities' evolving healthcare needs.

This process is a collaborative effort that brings together patients, caregivers, staff, and community members. We welcome any questions or feedback—please don't hesitate to reach out to us on our website.
